***Резюме:** Данная статья посвящена оценке политического развития шести постсоветских стран Восточной Европы и шести непризнанных государственных образований, которые существуют в этом же регионе. После почти тридцати лет государства эти страны стали основополагающими частями нового европейского региона — постсоветской Восточной Европы.*

Используя современные базы данных по развитию политических систем и режимов, автор измеряет и показывает разнообразие и общность в развитии региона. Автор, в частности, доказывает, что надежды начала 1990-х годов на демократическое и процветающее будущее не были полностью достигнуты в развитии постсоветских восточноевропейских государствах. Сегодня этот регион состоит из полусвободных и несвободных государств, а также несвободных самопровозглашенных государственных образований, противоречия между которыми, вероятно, приведут к будущим конфликтам в регионе.

***Ключевые слова:** СССР, национальное государство, суверенитет, постсоветский, политическая система, политический режим, экономика, человеческое развитие, непризнанное государство*

Полная версия статьи доступна на английском языке.
